## 5. Content

### Summary of content by theme

(providing a 'vertical' view through the programme)

The Media and Marketing programme has been designed to develop deep understanding of the media and marketing industries and to support students who want to work in the broad range of careers on offer in those areas.

The programme content has been developed in recognition of the technology-driven innovations which have fostered ever closer links between these two sectors, particularly in terms of brand content and storytelling which now central to so many business, public and third sector organisations.

Throughout the three years, the programme offers core modules which develop key marketing skills, alongside a deep understanding of the online and collaborative nature of media and business thanks to a plethora of digital and social media tools. There is a strong media theoretical context with an opportunity to develop either theoretical knowledge or practical skills through option modules or further develop specialist marketing knowledge.

The first year is made up of all core modules, three of which focus specifically on practical skills relevant to working in the media and marketing industries. Sector awareness is also developed, alongside relevant theoretical context. Finally, the Professional Development and Placement module begins the vital development of employability skills and encourages students to consider in detail how they might apply their studies to industry before they embark on a placement at the end of the year.

Students are introduced to a range of media skills, in particular online and digital skills, along with media theory, key marketing theories and marketing practice.

*Visual Branding* supports students in developing digital imaging, DTP, website and mobile design skills while *Online Research and Content Generation* focuses more specifically on the development of a variety of content for web and social media use.

*Marketing Fundamentals*, meanwhile, provides an introduction to the use of market research and market analysis, as well as the theory and practice of service and retail marketing.

*Analysing Media and Culture* focuses on the study of media and culture from a variety of critical, historical, analytical and theoretical perspectives while *Mapping the Media Landscape* is an academic module which looks closely at various media industries and roles both from an historical and a contemporary perspective.

Throughout Level 4 a range of transferable skills are developed and practised including effective communication, ICT applications, self management, autonomous learning and team working.

As the programme progresses, students are able to deepen both their theoretical knowledge and practical skills and are able to develop more specialist areas of knowledge with specific careers in mind.

At Level 5, the core *Social Business and the Sharing Economy* provides a comprehensive guide to the changing nature of the workplace, and of business models, in a socially and digitally connected world, focusing on how online connectivity is changing the way business is conducted.

Practical marketing skills are further developed in *Marketing Communications*, while understanding of media context, issues and theories, along with the academic research skills necessary for progression to the Level 6 dissertation are all explored in *Researching Media, Film and Culture*.

In terms of options modules, students can choose whether to increase their marketing knowledge through the selection of *Services Marketing* or take more media-focused pathway, including the *Documentary: Theory and Practice* module, which develops story-telling and content sharing skills.

At Level 6 core modules provide advanced level knowledge related to strategic marketing communications and e-business & e-marketing, as well as requiring students to undertake a 40-credit Media Research dissertation.

Students select options from both a marketing / business pathway and a media pathway allowing them to build on knowledge and skills in Level 5 and to develop advanced and independent study skills.

The combination of hands-on work-based experience, theory and practice (and theory into practice) study across all three levels enables students to develop and hone skills specific to marketing, social marketing, broader media environment and a range of employability skills.

## **7. Learning, teaching and assessment**

### **7a) Statement of the strategy for learning, teaching and assessment for the programme**

This programme is consistent with University Learning, Teaching and Assessment Strategy as follows.

- i) by aspiring to match best practice in HE in all aspects of the learning environment.
- ii) by embedding the principle of active learning in its work.

The Department aims to provide a distinctive learning experience:

- i) by fostering vocationally oriented aspects of learning wherever possible;
- ii) by engaging students with issues of ethics and values in appropriate curriculum contexts;
- iii) by enabling students to become effective lifelong learners and global citizens.

Programmes and schemes offered by the Department will meet the requirements of relevant policy documents, particularly the QAA Framework for HE Qualifications, relevant QAA Subject Benchmark Statements, Leeds Trinity's Strategic Plan and Leeds Trinity's Learning, Teaching and Assessment Strategy

The structure and content of the core academic/theoretical modules are designed so that from one level to the next, material is offered in a logical, coherent and progressive fashion which progresses student learning and critical understanding of the subjects. Modules at each level and from one level to the next relate one to each other in a manner which properly informs students of contemporary issues and practices, while simultaneously working to raise students' intellectual capacities to higher levels of inquiry.

Basic skills relevant to the professional/vocational element of the programme are introduced in the level 4 "practical" modules MFC4322 Online Research and Content Generation, MFC4342 Visual Branding and BMM4422 Marketing Fundamentals. These modules enable students to make an informed choice at level 5 and level 6 with regard to option modules.

An understanding of the ethical issues relating to media and marketing is built into the course throughout the core and core preference modules.

Group work is an integral part of the programme. This is consonant both with the subject benchmarks and the working practices of professional employment.

The Marketing content of the programme is explicitly vocational. The programme focuses on essential knowledge acquisition at Level 4, more detailed and specific subject knowledge acquisition and application at Level 5 and advanced subject knowledge at Level 6, where the emphasis is on the application of higher level intellectual skills including critical thinking, analysis, evaluation, synthesis and hypothesis formulation.

Techniques of research, analysis and evaluation are a distinctive element of higher education. The academic media core modules and strands at levels 4 and 5 provide the opportunity for students to learn higher level skills of analysis and critical thinking. At level 6 students apply their learning from levels 4 & 5 through independent but supported in-depth study. In Level 6, the emphasis is on learning rather than teaching with students exercising choice in terms of modules and managing their own workload in a supportive environment.

The programme uses a range of teaching methods including lectures, tutorials, seminars, workshops, project work and consultation as appropriate to the subject matter and student numbers. Small group learning is a feature throughout the programme.

Assessment in the programme:

1. uses a variety of written forms and practical activities and productions in order to reflect the academic and vocational elements of the programme;
2. uses a combination of coursework in order to test students' ability to work to different time-scales and within different constraints;
3. uses forms of work which are modelled on related professional practice as far as is consistent with working conditions and the requirements of effectiveness;
4. as a consequence of 3, is applied to group work only in strictly controlled situations;
5. progressively moves from testing breadth to depth of knowledge, understanding and skills;
6. as a consequence of 5, progressively limits the number of items per module required for assessment.
7. reflects the university's mission by its concern with development and the affirmation of individual learners;
8. achieves effectiveness by means of university procedures, policies and guidelines for design, marking and administration of processes.

The assessments in this programme are all in line with the university's assessment tariff (as adopted 2014). In determining the appropriate form of assessment for each module due regard was given to the nature of the module and the best means of enabling student to demonstrate they have met the objectives.

## 8. Entry requirements

A strong rationale must be provided for any deviation from the following norms; as a minimum, the "Other non-certificated requirements..." section must be completed:

### Honours degree programmes

Applicants should normally have achieved the following prior to registration for the programme:  
5 academic or vocational qualifications, of which at least 2 should be GCE 'A' levels (or equivalent at level 6) and one should be GCSE English Language at grade C (or equivalent).

Some equivalent qualifications and the current typical offer conditions in terms of UCAS Tariff points are detailed in the undergraduate prospectus. For students whose first language is not English a pass in an approved test in English is needed, eg. the International English Language Testing Service (IELTS) and the Test of English as a Foreign Language (TOEFL).

*Other non-certificated requirements...*

Applications are welcome from those with few or no formal qualifications. Any previous relevant work experience and learning will be assessed and, where appropriate, accredited as part of the application process. Please see Leeds Trinity's Principles and Guidelines for the Accreditation of Prior Learning.

## 9. Progression, classification and award requirements

Details of requirements for student progression between levels and receipt of the award(s)

(A certain level of attainment which must be achieved in a specific module; any modules exempted from condonement, any deviation from the standard institutional stipulations for award classification, eg. exclusion of Level 4 module marks from Foundation Degree classification)

To progress to Level 5: 120 credits at Level 4. The 20-credit Professional Development and Placement module is not eligible for condoned failure.

To progress to Level 6: 120 credits at Level 5. The 20-credit Professional Development and Placement module is not eligible for condoned failure.

## 10. Prerequisites

Details of modules which must be passed before enrolment on a module at a higher level

*Include the rationale which justifies imposition of the prerequisite(s) and the mark/grade required.*

The PDPM modules at Levels 4 and 5 must be passed and are not eligible for condoned failure. This is standard procedure across Leeds Trinity University.

## 11. External examining arrangements

External examining arrangements

(eg. joint with another programme – extended duties for someone already in post – or separate, single/multiple examiners; if multiple examiners, which subjects / types of module are to be allocated to each)

This programme is overseen by external examiner Carole Poole. Some individual theory modules are viewed by a second MFC external examiner, Steve Jones. The individual BMM modules are also overseen by BMM external examiners.

## 12. Additional information

Details regarding arrangements in respect of any special features of the programme/scheme, (eg. a non-standard delivery pattern, study abroad, a field course, specific work placement, opportunities for onward progression from foundation degrees)

Students will have the choice of three types of placement for their work experience 6 weeks in each year, all dependent on successful application and interview.

1. An external work experience placement.
2. A work experience placement with Trinity Vision as part of our professional media production agency.
3. The opportunity to complete their own project or work on their own business supported and mentored within the new Enterprise and Inubation Centre.

### **13. Additional support needs**

Arrangements made to accommodate students with additional support needs and any unavoidable restrictions on their participation in the programme/scheme

(Key aspects of the Equality Impact Assessment for the Department – see Internal Audit Form NP2G for further details)

Students with disabilities will be welcomed on the course and reasonable adjustments will be made wherever possible to accommodate their individual needs. Students with visual or hearing impairments might have difficulty accessing certain professional pathways involving practical production work and these will be addressed as individual cases arise. Some students with physical impairments might encounter difficulties with using production equipment. In some cases this might require personal assistance.
