

PROGRAMME SPECIFICATION

1. General information

Awarding body / institution	Leeds Trinity University
Teaching institution	Leeds Trinity University
Professional accreditation body	British Psychological Society
Final award	BSc (Hons)
Title of programme(s)	Psychology
Subsidiary award(s)	-
In the case of a Scheme of Study, the other Scheme(s) with which it may be combined	-
Duration and mode(s) of study	3 Years Full-time, 6 Years Part-time
Start date (this version)	September 2014
Periodic review next due	AY 2015/16
UCAS course code & code name	C700 BSc/PSYCHS
Venue(s)	

2. Aims of the programme

Rationale and general aims

The aims of the BSc (Hons) Psychology programme are

- 1. to provide students with a scientific understanding of the mind, brain, behaviour and experience, and of the complex interactions between these;
- 2. to provide students with the opportunities to develop knowledge and a critical understanding of psychological theory, research findings and applications and the relationships between these;
- 3. to provide students with knowledge and understanding of multiple perspectives within psychology in a way that fosters critical evaluation;
- 4. to enable students to develop the knowledge and research skills necessary for investigating a range of experience and behaviour;
- 5. to enable students to consider the status of psychology as an empirical science and appreciate the ethical issues surrounding psychological research and practice;
- 6. to meet the accreditation requirements of the British Psychological Society (BPS) for the award of the Graduate Basis for Chartered Membership (GBC), which is the first step towards a career as a Chartered Psychologist;
- 7. to develop a range of transferable personal, practical and intellectual skills, directly relevant to many forms of employment and training;
- 8. to produce graduates who have experience of working in a professional setting and who

are confident in applying their knowledge, skills and understanding in the world of work and who recognise the contribution that psychology can make to an understanding of behaviour and experience.

3. Student learning outcomes of the programme

Learning outcomes in terms of:

- knowledge and understanding (K)
- intellectual / cognitive / 'thinking' skills (I)
- physical skills specific to the subject (P)
- key / transferable skills (T)

The 'K1', etc codes are used in section 7c) and module descriptors to refer to each of these learning outcomes.

On successful completion of the BSc (Hons) Psychology programme, students will have provided evidence of (or evidence demonstrating):

- K1 knowledge and understanding of psychology as a scientific, systematic, dynamic on-going process of enquiry;
- K2 the ability to apply knowledge and understanding in a professional context;
- K3 an awareness of the range and breadth of the discipline;
- K4 knowledge and understanding of the approaches adopted in different fields of psychology;
- K5 understanding and application of the main methods of psychological research and analysis, including quantitative and qualitative methods and approaches;
- 11 vocationally relevant skills in a professional context;
- 12 the ability to critically evaluate psychological theory and research;
- 13 the ability to reflect on the relationship between practical experience and theoretical understanding;
- I4 original thinking in selected areas of the discipline;
- 15 the ability to initiate, design, conduct, analyse and report an empirically based research project under appropriate supervision, whilst conforming to ethical principles and codes of professional conduct;
- E1 **Self-management** the ability to plan and manage time; readiness to accept responsibility and improve their own performance based on feedback/reflective learning; the ability to take initiative and be proactive, flexible and resilient;
- E2 **Teamworking** the ability to co-operate with others on a shared task and to recognise and take on appropriate team roles; leading, contributing to discussions and negotiating; contributing to discussions; awareness of interdependence with others;
- E3 **Business and sector awareness** an understanding of the key drivers for business success, including the importance of customer/client satisfaction and innovation; understanding of the market/sector in which an organisation operates; the ability to recognise the external context and pressures on a organisation, including concepts such as value for money, profitability and sustainability;
- E4 **Problem-solving** a capacity for critical reasoning, analysis and synthesis; a capacity for applying knowledge in practice; an ability to retrieve, analyse and evaluate information from different sources;
- E5 **Communication** the ability to present information clearly and appropriately, both orally and in writing, and to tailor messages to specific audiences and purposes;

- E6 **Application of numeracy** a general awareness of mathematics and its application in practical contexts; the ability to carry out arithmetic operations and understand data, to read and interpret graphs and tables and to manage a budget;
- E7 **Application of information technology** the ability to identify the appropriate IT package for a given task; familiarity with word-processing, spreadsheets and file management; the ability to use the internet and email effectively.
- E8 **Entrepreneurship/enterprise** the ability to demonstrate an innovative approach and creativity, to generate ideas and to identify and take opportunities;
- E9 **Social, cultural & civic awareness** embracement of an ethos of community and civic responsibility; an appreciation of diversity and ethical issues; an understanding of cultures and customs in the wider community.

See also the generic objectives set out in section 4 below.

Statement of congruence with the relevant published subject benchmark statements

The learning outcomes are consistent with the most recently published Psychology Benchmark Statement (Quality Assurance Agency for Higher Education, 2007), the Framework for Higher Education Qualifications and with the requirements for Graduate Basis for Chartered Membership (GBC) of the BPS, the University's Learning, Teaching and Assessment Strategy and widening participation strategy.

Eligibility for GBC

GBC is only granted to finalists who achieve a 2.2 classification or higher.

4. Learning outcomes for Certificates and Diplomas of Higher Education and ordinary degrees

Guidance	
	Generic learning outcomes for the award of <u>Certificate of Higher Education</u> :
The assessment strategy is	On successful completion of at least 120 credits, students will have demonstrated an ability to:
designed so that each of these outcomes is	i) interpret and evaluate data appropriate to the discipline;
addressed by more than one module at Level 4.	make sound judgements in accordance with basic disciplinary theories and concepts;
	iii) evaluate the appropriateness of different approaches to solving problems within the discipline;
	iv) communicate the results of their work coherently;
	and will have had specific opportunities to display transferable skills relevant to employment related to the discipline.
	Generic learning outcomes for the award of <u>Diploma of Higher Education</u> :

The assessment strategy is	On successful completion of at least 240 credits, students will have demonstrated, in addition to the outcomes for a Certificate:
designed so that each of these outcomes is	i) critical understanding of disciplinary principles;
addressed by more than one module over Levels 4 and 5.	ii) application of concepts outside their initial context;
module over Levels 4 and 5.	iii) use of a range disciplinary techniques;
	iv) proficient communication of the results of their work;
	and will have had the opportunity to develop transferable skills relevant to employment related to the discipline including successful completion of at least one professional placement or school based training component.
	Generic learning outcomes for the award of an <u>Ordinary Degree</u> :
The assessment strategy is	On successful completion of at least 300 credits, students will have demonstrated, in addition to the outcomes for a Diploma:
designed so that each of	i) an ability to make flexible use of disciplinary concepts and techniques;
these outcomes is addressed by more than one	ii) critical evaluation of approaches to solving problems in a disciplinary context;
module over Levels 4, 5 and 6.	iii) an ability to work autonomously within a structured learning experience;
0.	iv) effective communication of the results of their work in a variety of forms;
	and will have had the opportunity to develop transferable skills relevant to employment related to the discipline including successful completion of two professional placements or school-based training placements.

5. Content

Summary of content by theme (providing a 'vertical' view through the programme)

BSc (Hons) Psychology students study a core curriculum designed to provide a thorough grounding in core theoretical areas (biological, cognitive, developmental, individual differences and social psychology), which are all introduced at Level 4 and then studied at a more advanced level in Level 5. This grounding provides students with the necessary breadth and depth of knowledge of core psychological domains to allow further study of more specialised areas at Level 6. Alongside this, students at Level 4 study PSY 4272 *Psychology in Practice*, which introduces them to the breadth of applications of psychology in the workplace. A range of contemporary controversies and debates in Psychology is introduced in PSY 4252 *Controversial issues in Psychology*.

Skills in research design and analysis are introduced in PSY 4012 and are then further developed in PSY 5012. The main focus of these modules is to provide students with the theoretical knowledge and practical skills to enable them to undertake research using a range of quantitative and qualitative methods and approaches. The culmination of the research methods work provided throughout the programme is the completion of PSY 6114 *Major Research Project*, in which students are supervised to design and undertake a small-scale piece of research in an area of their choice, using whichever research methods are most appropriate for investigating their chosen research questions.

The programme provides the opportunity to develop a range of personal and intellectual skills appropriate to graduates and in particular for individuals intending to make their careers as professional psychologists. Emphasis is placed upon learning through practical classes, group project work and research projects. Communication skills are fostered by group and individual presentations, leading seminars and a variety of written assignments. Opportunities to develop other career-relevant skills, such as teamwork, time management and the collection and analysis of information, are provided throughout the programme by means of class exercises and module assessments. Several modules, especially those at Level 6, require autonomous learning for successful completion. Whilst providing a curriculum that is relevant for GBC of the BPS, the programme is also sufficiently broad to provide a balanced and career-relevant education for those not seeking to work as chartered psychologists. Embedded within the programme are *Professional Development and Placement* modules (PSY 4072 and PSY 5072) which furnish students with the opportunity to undertake two six-week work placements in order to develop employability skills and experience.

6. Structure

	PSYCHOLOGY (Single Honours)		
Duration: Total credit	3 years full-time / 6 years part-time rating: 360		
Level 4			
Please see s	ection 8 and refer to the Prospectus for entry requirements.		
	didates are required to take:		
PSY 4012	Research Methods in Psychology 1	Sem 1 & 2	20 credits
PSY 4072 PSY 4252	Professional Development and Placement in Psychology Controversial Issues in Psychology	Sem 1 & 2 Sem 1 & 2	20 credits 20 credits
PSY 4252 PSY 4262	Introduction to Cognitive and Biological Psychology	Sem 1 & 2	20 credits 20 credits
PSY 4272	Psychology in Practice	Sem 1 & 2	20 credits
PSY 4282	Individual Differences, Social & Developmental Psychology	Sem 1 & 2	20 credits
Level 5			
	requirements: minimum of 120 credits from Level 4.		
	didates are required to take:		
PSY 5012	Research Methods in Psychology 2	Sem 1 & 2	20 credits
PSY 5022	Cognitive and Developmental Psychology	Sem 1 & 2	20 credits
PSY 5042 PSY 5052	Biological and Social Psychology Seminal Studies in Psychology	Sem 1 & 2 Sem 1 & 2	20 credits 20 credits
PSY 5092	Dialogues, Debates and Diversity in Psychology	Sem 1 & 2	20 credits
Options [.] Ca	ndidates are required to take one of:		
PSY 5072	Professional Development and Placement in Psychology	Sem 1 & 2	20 credits
PSY5692	Professional Development and Placement (Volunteering) in Psychology	Sem 1 & 2	20 credits
	FSychology		
<u>Level 6</u> Progression	requirements: minimum of 120 credits from Level 4, and 120 c	redits from Leve	15
	lidates are required to take:		
PSY 6114	Major Research Project	Sem 1 & 2	40 credits
	ndidates are required to choose 80 credits from:		
PSY 6032	Business Psychology	Sem 1 & 2	20 credits
PSY 6052	Aspects of Health Psychology	Sem 1 & 2	20 credits
PSY 6062 PSY 6122	Applying the Mind	Sem 1 & 2 Sem 1 & 2	20 credits
PSY 6222	Psychology Special Subject Forensic Psychology	Sem 1 & 2	20 credits 20 credits
PSY 6322	Childhood and Society	Sem 1 & 2	20 credits
PSY 6412	Psychology and Advertising	Sem 1	20 credits
PSY 6422	Biopsychology of Stress & Health	Sem 1 & 2	20 credits
PSY 6432	Abnormal and Clinical Psychology	Sem 1 & 2	20 credits
	Counselling Psychology	Sem 1 & 2	20 credits
PSY 6462		Sem 1 & 2	20 credits
PSY 6462 SHN 6712	Applied Sports Psychology	0011102	

7. Learning, teaching and assessment

7a) Statement of the strategy for learning, teaching and assessment for the programme

The programme meets the requirements of relevant policy documents, particularly the QAA Framework for HE Qualifications, relevant QAA Subject Benchmark Statements, Leeds Trinity Mission Statement and Corporate Plan and Leeds Trinity Learning, Teaching and Assessment Strategy.

The structure and content of the modules are such that, from one level to the next, material is offered in a theoretically coherent fashion which progresses student learning and understanding of the subject. They relate one to each other in a manner which properly informs students of contemporary issues within Psychology, while simultaneously working to raise students' intellectual capacities to higher levels of inquiry. The period of work-based learning provides the opportunity for students to apply their learning in a professional setting and develop and evaluate their key transferable skills.

An understanding of the ethical issues relating to Psychology is built into the programme through the core and option modules. Modules PSY 4012, PSY 5012 and PSY 6114 cover research design and statistics, with a focus upon ethically sound research. The programme has been developed in such a way that the amount of independent study increases over the three years. At Level 4 the emphasis is on teaching the basic skills. By Level 6 the emphasis is on learning rather than teaching, with students exercising choice in terms of modules and managing their own workload in a supportive environment.

The programme uses a range of teaching methods including lectures, tutorials, seminars, workshops and practicals as appropriate to the subject matter and student numbers.

Assessment within the programme:

- 1. uses a variety of written forms and practical activities in order to reflect the academic and vocational elements of the programme;
- 2. uses a combination of coursework and timed examinations at each level in order to test students' ability to work to different time-scales and within different constraints;
- 3. progressively moves from testing breadth to depth of knowledge, understanding and skills;
- 4. reflects the University's mission by its concern with development and the affirmation of individual learners;
- 5. achieves effectiveness by means of University and departmental procedures, policies and guidelines for design, marking and administration of processes.

7b) Module details

Module number	Learning and		Assessment											
and name	Teaching Methods	Form	Magnitude	Weighting	Timing	(module co-ordinator as first name and in bold)

8. Entry requirements

Honours degree programmes

Applicants should normally have achieved the following prior to registration for the programme:

5 academic or vocational qualifications, of which at least 2 should be GCE or VCE 'A' levels (or equivalent at level 3) and two should be GCSE English Language and GCSE Mathematics at grade C (or equivalent).

Some equivalent qualifications and the current typical offer conditions in terms of UCAS Tariff points are detailed in the undergraduate prospectus. For students whose first language is not English a pass in an approved test in English is needed, eg. the International English Language Testing Service (IELTS) and the Test of English as a Foreign Language (TOEFL).

Applications are welcome from those with few or no formal qualifications. Any previous relevant work experience and learning will be assessed and, where appropriate, accredited as part of the application process. Please see the University's Assessment of Prior Learning (APL) procedures.

9. **Progression, classification and award requirements**

Details of requirements for student progression between levels and receipt of the award(s) (Modules which <u>must</u> be passed for progression and award; any deviation from the standard College stipulations for award classification)

Standard University stipulations apply

10. Prerequisites

Details of modules which <u>must</u> be passed before enrolment on a module at a higher level *Include the rationale which justifies imposition of the prerequisite(s).*

Standard University stipulations apply

11. External examining arrangements

External examining arrangements (eg. joint with another programme or separate, single/multiple examiners and which modules covered by each)

Two external examiners will be responsible for this programme. They will both be academics with substantial experience of teaching in Psychology at undergraduate level. Both will have GBC of the BPS.

12. Additional information

Details regarding arrangements in respect of any special features of the programme/scheme, eg. study abroad, a field course, specific work placement, opportunities for onward progression from foundation degrees

13. Additional support needs

Arrangements made to accommodate students with additional support needs and any unavoidable restrictions on their participation in the programme/scheme (Key aspects of the Equality Impact Assessment for the Programme – see Form NP2G for further details)

Reasonable adjustments will be made to accommodate students with additional support needs. There are no unavoidable restrictions on the participation of such students in the programme.
