2. Aims of the programme

Rationale and general aims
<p>This programme aims to offer students an opportunity to study for a joint degree in the inter-related social science disciplines of Criminology and Sociology. It aims to develop your critical awareness of criminological and sociological issues in an increasingly globalised world. We live in a world in which our actions, and those of others, impact upon people who are at a distance from us, culturally and spatially, and who we frequently only know about through the mass media. The sociological modules in your degree will allow you to explore these aspects of social life.</p> <p>Criminology explores the nature of crime, policing, victimisation, imprisonment, media representations and justice systems. It examines constructions of criminalisation and victimisation, including responses to them that do not involve official (public) policing and the criminal justice system. It analyses social definitions of crime and criminal behaviours and reflects upon competing social, historical, and cultural concepts of justice and punishment. Sociology examines the ways that social life is constructed, maintained and reproduced. It utilises empirical research and theory</p>

to examine issues such as social inequalities, identities, social conflict and consensus, social problems, policy construction, the mass media and social deviancy.

Criminology and Sociology use a variety of empirical research tools and techniques to investigate aspects of social life. To this end, they gather different kinds of data about it from a range of quantitative and qualitative methods. Sociologists and Criminologists often interpret data in the light of theory and relate it to ongoing developments in law and social policy. The knowledge that these scholars produce develops an understanding of contemporary social problems and can shape policy responses to them.

This programme will develop your understanding of a variety of Criminological and Sociological theories. It will also enable you to become familiar with professional research practice in both disciplines. Modules aim to develop your understanding of global trends and smaller scale aspects of everyday life. Your modules will draw upon staff research experience in criminological theory, the Sociology of Identity, Theories of Punishment and Rehabilitation, the Sociology of Education, Forensic Psychology and the Sociology of Religion. Your programme also aims to explore ethical issues that sociologists and criminologists face as they conduct their work.

The programme's research modules will enable you to understand the importance of gathering, analysing and evaluating quantitative and qualitative empirical data. Your understanding of research methodologies will be supported by a range of current technology, software packages and applications for conducting empirical research and presenting your findings persuasively so that the knowledge you acquire can be used to change minds.

But what makes Leeds Trinity University's Criminology and Sociology programme distinct is the way all these elements have been designed to be combined and integrated in the context of professional practice. The placement modules will allow you to test your academic knowledge, to develop experiences that inform and develop academic knowledge in future modules, to develop professional networks, to learn about possible ways of working with an organisation to develop a final year professional research project, and to show you the range and diversity of graduate-level jobs in fields allied to Criminology and Sociology.

Our placement modules are supported by Leeds Trinity University's existing links with a wide range of organisations such as Armley Prison, the West Yorkshire Police Training College, and various Youth Justice organisations in Leeds.

5. Content

Summary of content by theme

(providing a 'vertical' view through the programme)

The programme is delivered through these discipline themes at Levels 4 and 5 with a range of specialist, stranded option modules at Level 5 and 6. This focus on the programme structure to manage the development of student confidence in their abilities. 7. Learning, teaching and assessment

7a) Statement of the strategy for learning, teaching and assessment for the programme

The learning and teaching provision on the Criminology and Sociology programme is aligned with the University's Learning, Teaching and Assessment Strategy 2015-2020, supporting the principle that you are co-creators of your own learning and providing the skills and understanding required for you to manage that learning. The programme's modules offer small-class sizes, student choice about the materials and issues used to complete the assessments and teaching methods that enable active student participation in learning (both as individuals and in groups), with regular provision of formative feedback on those activities.

The programme is designed to produce graduates, who have a strong capacity for critical sociological thinking and empirical analysis. Students will develop an array of skills through core modules on theory and methods. The teaching will be mainly student-led. As noted in section 5 above, the content is divided into broad thematic strands: Criminology, Sociology, academic skills and research methodology; and professional practice. Cutting across these are the three levels, which are used as three main stages of development within the learning and teaching. A description, by level, is as follows:

Level 4: to understand the nature of Criminology and Sociology, particularly in their interdisciplinary nature, the range of skills and abilities required for professional practice, and the basic methods required and for criminological and sociological research;

Level 5: to practise those disciplines;

Level 6: to gain enough expertise in those disciplines to propose creative blends or hybrid innovations, in line with industry, agency, or sector requirements.

Programme-Level Assessment takes place at Level 4. This is delivered through a 2-week practical project, scheduled before the placement. It integrates the learning for this level and helps identify the progressive Level structure of the programme. At Level 6 the Professional Research Project performs an equivalent integrative and demonstrative function.

Level 6 provides scope for individual self-directed project work, preparing you for graduate-level employment or further professional study. This includes a 40-credit module (SOC 6044 *Professional Research Project*), which provides you with an opportunity to develop your academic interests through independent learning.

Assessment methods will vary across modules level and its specific discipline, though assessment through practice will be foremost, with critical reflection aspects expected to be integrated with and manifest through practical work.
